PROFILE

AI & Data Science undergraduate with expertise in Python, Full Stack Development, FastAPI, React, SQL, and Machine Learning. Currently learning AWS Cloud and DevOps to build scalable, cloud-native applications. Passionate about software development, backend engineering, automation, and applying AI to solve real-world problems. Committed to continuous learning and delivering high-quality, efficient software solutions.

EXPERIENCE

Full Stack Development Intern

12/2025 – 01/2026
coimbatore

Jawa Edtech

Developed and implemented full-stack web application features using HTML, CSS, JavaScript, Node.js, and MySQL. Built responsive user interfaces, developed RESTful APIs, managed database operations, and optimized SQL queries. Tested APIs using Postman, resolved application issues, and collaborated with the development team to enhance functionality, performance, and user experience.

EDUCATION

B.Tech Artificial Intelligence and Data Science

2024 – 2028
Coimbatore

KPR Institute of Engineering and Technology
CGPA: 7.82

HSC / SSLC

2020 – 2024
Annur

Nava Bharath National School
HSC: 76.7% SSLC: 71.2%

TECHNICAL SKILLS

Programming Languages

Python, Java, JavaScript, MYSQL

Artificial Intelligence

Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, XG Boost

FULL STACK

HTML, CSS, React.js, FastAPI, REST APIs
, SQLAlchemy, JWT Authentication, PostgreSQL

Cloud&Devops

AWS, Docker, Git, GitHub, Linux, CI/CD(Basics)

Tools and Platforms

VS Code, Postman, Swagger, Render, GitHub
Actions(Basics)

Core Concepts

Data Structures, Algorithms, OOPs, Statistics,
Feature Engineering, Model Evaluation, Data
Analysis

ACHIEVEMENTS AND CERTIFICATIONS

Achievements and Certifications

- Best paper award (7TH International Conference on Computational Intelligence and Industry 5.0 - VIT Chennai)
- Practical Cyber Security for Cyber Security Practitioners (NPTEL)
- Multi cloud mastery workshop (AWS|Azure|GCP)

CODING PROFILES

Coding Profiles

- CodeChef  : Solved Data Structures and Algorithms problems across core topics.
- HackerRank  : Solved Python and SQL skill badges by solving coding challenges.

PROJECTS

Crime Pattern Visualization & Prediction Tool

Crime Prediction & Analysis System | Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, SQL, Jupyter Notebook | Features: Crime trend analysis, hotspot visualization, ML-based crime prediction. Developed a data science solution to analyze historical crime data, identify spatial and temporal patterns, visualize crime hotspots, and predict potential crime occurrences to support data-driven decision-making.

Adaptive Human-AI Collaborative Digital Twin For Intelligent Robotic Arm Optimization In Industry 5.0

AI-Powered Digital Twin for Robotic Arm Optimization | Python, Flask, Flask-SocketIO, Scikit-learn, TensorFlow, SHAP, Pandas, NumPy, Plotly, Three.js, HTML, CSS, Bootstrap, SQLite | Features: Real-time robotic arm monitoring, digital twin simulation, AI-assisted optimization. Developed a digital twin system that integrates AI-driven analytics to monitor robotic arm performance, enable predictive maintenance, optimize operations, and support human-AI collaboration for adaptive control in Industry 5.0 manufacturing environments.

AI Multi-Agent Project Manager

AI-Driven Project Management System | React.js, Node.js, Express.js, MySQL, Groq LLM, RAG, Railway, Vercel | Features: Multi-Agent AI, project planning, risk analysis, meeting intelligence, task management, automated documentation, cost estimation. Developed a full-stack AI platform that uses multiple intelligent agents to streamline project planning, automate documentation, analyze risks, and monitor project progress.
